**DETAILED ACTION**

***Information Disclosure Statement***

1. The information disclosure statement filed June 14, 2004 has been considered.  
Please see the attached initialed PTO-1449s.

***Specification***

2. The disclosure is objected to because of the following informalities: formula 1 on page 14 is missing the initial G (compare claim 7) and formula 2 (GPGCYG) does not correspond to SEQ ID NO: 4 (compare claim 8 - GPSGPG).

Appropriate correction is required.

***Claim Rejections - 35 USC § 102***

3. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

4. Claims 1-22 are rejected under 35 U.S.C. 102(b) as being clearly anticipated by Philippe et al. (6,280,747).

Philippe et al. teach the claimed cosmetic ingredients in combination with the claimed protein; the sequence recited in instant claim 7 is taught in Figure 6A and the sequence recited in instant claim 8 is taught in Figure 7A. Philippe et al. do not explicitly state that their proteins are water-soluble but since the same monomers are taught in the same number of repeats, the resulting proteins must inherently be water-soluble.

***Claim Rejections - 35 USC § 103***

5. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

6. This application currently names joint inventors. In considering patentability of the claims under 35 U.S.C. 103(a), the examiner presumes that the subject matter of the various claims was commonly owned at the time any inventions covered therein were made absent any evidence to the contrary. Applicant is advised of the obligation under 37 CFR 1.56 to point out the inventor and invention dates of each claim that was not commonly owned at the time a later invention was made in order for the examiner to consider the applicability of 35 U.S.C. 103(c) and potential 35 U.S.C. 102(e), (f) or (g) prior art under 35 U.S.C. 103(a).

7. Claims 1-22 are rejected under 35 U.S.C. 103(a) as being unpatentable over Philippe et al. (6,280,747) in view of Stedronsky.

The teachings of Philippe et al. are outlined above. Stedronsky teaches how to enhance the water solubility of polymers, particularly proteins, and, at column 1, lines 10-57, explain the advantages of using water-soluble proteins. It would have been obvious to one of ordinary skill in the art at the time the invention was made to choose to make the shorter polymers of the monomers taught by Philippe et al. so as to make the proteins water soluble in order to gain the advantages taught by Stedronsky.

### ***Conclusion***
